1	Develop the ability to use critical, analytical, and reflective thinking and reasoning	x			x		x	x	x		x					x		x	x				x			x	x				
2	Reflect on social and ethical responsibilities in his/her professional life.																					x						x			
3	Gain experience and confidence in the dissemination of project/research outputs																				x										x
4	Work responsibly and creatively as an individual or as a member or leader of a team and in multidisciplinary environments.	x								x	x												x							x	
5	Communicate effectively by oral, written, graphical and technological means and have competency in English.																				x										x
6	Independently reach and acquire information, and develop appreciation of the need for continuously learning and updating.		x		x		x	x										x							x	x					
7	Design and model engineering systems and processes and solve engineering problems with an innovative approach.	x	x	x		x	x	x			x	x	x	x			x	x	x					x	x	x				x	
8	Establish experimental setups, conduct experiments and/or simulations.		x	x		x	x		x			x	x		x		x	x						x	x		x		x		
9	Analytically acquire and interpret data.		x	x		x			x			x			x		x							x			x		x		
10	To have knowledge and experience in the research, design, analysis and development of advanced manufacturing and production systems and the machinery and equipment of these systems						x					x						x							x						
11	Identify product performance and manufacturing processes relationship and optimize process parameters		x																								x				
12	Interpret the resultant data to improve the quality and performance of a product	x									x														x						
13	Research and apply manufacturing engineering knowledge on industrial applications	x									x														x
